

Complete Water Analysis Solutions

At Hach[®], we understand your needs when it comes to maximizing efficiency of your oil & gas operations. With more than 65 years as the leading expert in water quality analysis, you can trust Hach's knowledgeable and responsive support team to address your unique needs for water applications throughout your entire process including drilling, fracturing, injection, reuse and utility water applications.

TSS W sc Turbidity and Suspended Solids Probe

- Multiple beam alternating light facilitates accurate measurement.
- Highly polished stainless steel; scratch resistant sapphire window.
- Wiper option for reliability in high solids environments.
- Options available for C1D2 hazardous locations.

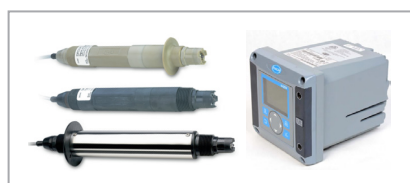

LDO sc Model 2 Dissolved Oxygen Sensor

- No Calibration Required; uses luminescent dissolved oxygen technology.
- No membranes to replace, no electrolyte solution to replenish, and no anode or cathode to clean. Wide range of mounting options available with replaceable sensor cap.
- Aeration energy process control for bioreactors.

GS2440EX Hydrogen Sulfide Sensor

- Liquid phase hydrogen sulfide sensor, employing electrochemical principals.
- Robust, fouling-resistant measurement in water or air.
- Hazardous certifications including ATEX/C1D2.
- Options for battery-powered, cellular enabled field transmission.

pH / Conductivity sensors and controllers

- Made for harsh environments: Kynar/PVDF, PEEK, Ryton/PPS options.
- Mounting options including immersion, insertion, union, sanitary.
- Universal analog/digital controllers and transmitters.
- C1D2 options available (SC200 model shown: LXV404.99.01102).

HQd Meters & IntelliCAL™ Probes

- Portable handheld analysis for field environments; waterproof IP67 rating.
- Smart sensors embed calibration data and history.
- Full suite of interchangeable IntelliCAL field probes for testing Conductivity, DO, ORP, pH, Ammonia and more.
