inspection SYSTEM

RinnoVision's Manhole Inspection Systems offer a fast, safe alternative to sending workers into manholes to conduct inspections. Equipped with a 360-degree virtual reality camera, the available systems provide real-time viewing of conditions inside pipes, manholes, tanks, tunnels, wells and other confined spaces. The wireless systems include a 30' telescopic pole and 100' tripod for maximum reach.

RinnoVision RV-MAX 360

RV-MAX 360 Features
