CAMERA

Capture clear, detailed video of pipes relined 6" to 48" and larger with our innovative Voyager™ HD Mainline Inspection Camera. It is a compact HD 1080p x 1920p pan and tilt video camera with 120x zoom. Keep the lens clean without retrieving the camera from the pipe with Aries built-in lens v er

technology. Optional dual camera lasers ensure accurate crack measurement.

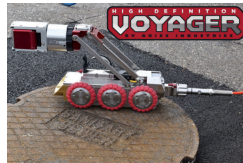

The Voyager WiperCam camera is part of the [Voyager HD Mainline Inspection System](#) which also includes a [powerful transporter](#), and 1200' cable reel — controlled by CANbus technology for instant crawler and camera response. Components are operated by an ergonomically advanced dual joystick controller and reel-mounted pendant.
