rehabilitation trailers

SOLUTIONS

Sewer inspection and rehabilitation trailers offer a flexible way to get your equipment where you need to go. Ideal for crews who share equipment or who need a working platform that is always available to tow by multiple trucks. Aries trailers offer you the versatility you need without sacrificing comfort or functionality.

Hit the Road

Aries trailers come in a range of sizes, with 7×14 being the most popular.

Available power sources: Gas Generator (7K)

STANDARD LAYOUT. Our standard trailer design evolved from years of listening to what our customers want from their vehicles.

Thoughtfully designed for operator comfort, safety and with easy access to equipment and extras – we’ve considered every detail and maximize every inch of space.

CUSTOMIZED BUILDS. What really sets Aries vehicles apart is the wide range of customization options we can offer. From extra lighting, additional storage, to climate control and safety features, we make sure the trailer you get is the one your crew needs to maximize their time in the field.

All of our vehicles are built on site at our Waukesha, ^
Wisconsin facility. This streamlines our ability to meet
your customization requests.
