

Grouting System Truck

Aries vehicle-mounted grouting system provides a complete solution for addressing groundwater infiltration into sewer mains and laterals. We can customize a new truck or retro-fit an existing vehicle.

Fast & Accurate Grout Delivery

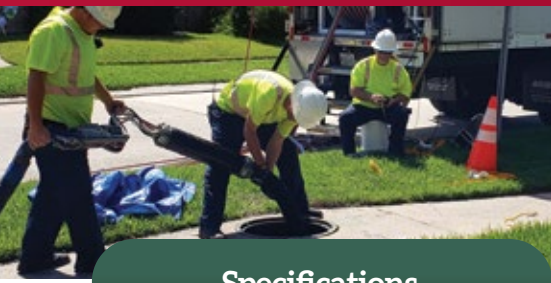

- High-power winches move the packer between joints quickly
- 800' grout house for multiple run set-ups from a single entry point
- High-volume, electric CAT triplex pumps for precise grout delivery

Easy & Efficient Operation

- 60-gallon grout tanks with continuous-duty mixers for fast mixing of the chemical.
- Simple, push-button operation reduces test and seal time

Complete View

- Easy to read gauges keep operator informed on flows and pressures
- Equipped with complete TV inspection system to monitor the grouting process

Specifications

Grouting System Truck

Advanced Technology

Groundwater infiltration into sewer systems is a major problem for many municipal sewage treatment plants. Aries Grouting System Truck offers unparalleled performance and productivity, providing the ideal solution to seal leaks and stop infiltration through joints and defects in sewer pipes.

Aries Grouting System

Grouting System Truck Features:

- Meets requirements of ASTM standard practices for chemical grouting of Mains (ASTM F: 2304-3), Laterals (ASTM: 2454 -05), and Manholes (ASTM: F2412-04).
- Air test monitoring pressure transducer.
- Grout volume in gallons/liters pumped displayed on grout panel for simple record keeping and data capture.
- Electric CAT Triplex pumps feature high volume, variable speed motors. Adjustable bypass pressure regulation allows operator to effectively perform all manhole and joint sealing.
- Grout systems outfitted with five part penta hose ready for mainline or lateral service connection grouting.
- Consistent, optimal power is provided with ample size on-board power generators, air compressors and vacuum pumps.
- Optional winter work doors, propane heaters, and climate-specific design features available.
