# TECHNICAL SPECIFICATION

KÄSSBOHRER GELÄNDEFahrZEUG AG

# BeachTech Sweepy with mechanical tractive unit

## The alternative - robust, simple, cost-effective

The pushed BeachTech for cleaning and maintenance of small beach sections – e.g. between reclining chairs. Also suitable for the maintenance of playgrounds, volleyball fields and other sand-covered areas.

The variant with mechanical tractive unit and 3-speed gear box also allows for convenient operation. The "light" version for smaller budgets.

## Technology

The twin sifting screens minimize the oscillations. They clean effectively even when the sand is wet and at great depth when the sand is dry. They collect cigarette butts, broken glass, wood particles, cans, rocks and much more. The 360° on-the-spot turning capability and the reverse gear make the machine agile.

Professionalism even under difficult conditions. This is ensured by the low center of gravity and the sturdy design. These features particularly reduce the mechanical maintenance effort and wear of the BeachTech Sweepy.

## Auxiliary equipment

To the beach in the morning – to the park at noon: The modular quick-change system broadens the range of potential applications to more than just sandy areas: as a street sweeper, leaf vacuum, snow blower, salt spreader, etc. Multifunctionality is guaranteed. Because it would be a pity if your beach cleaner spent most of its time sitting and waiting to be used for just one application. A wide variety of off-beach uses means short downtimes and thus maximum efficiency.

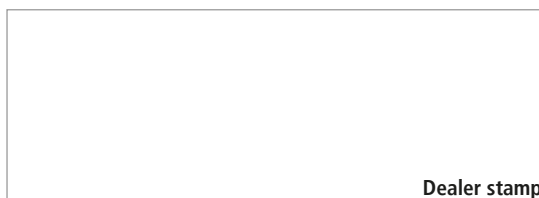

## Data sheet

<b>Working width</b>	1,050 mm
<b>Area coverage</b>	up to ** 4,200 m <sup>2</sup> /h
<b>Working depth</b>	up to ** 120 mm
<b>Dimensions</b>	
Length	2,550 mm
Width	1,195 mm
Height	Handlebar adjustable from approx. 600 to 1,400 mm
<b>Engine</b>	4-stroke gasoline engine with air cooling – 7.09 kW
<b>drive</b>	Working speeds set via 3 forward and reverse gears
<b>Steering</b>	Wheels braked separately for steering and turning
<b>Speed</b>	up to 6.5 km/h
<b>Cleaning equipment</b>	Double screens working in opposite directions and exchangeable with 2 different mesh sizes*
<b>Waste container</b>	44 L, extricable
<b>Collecting container capacity</b>	80 L
<b>Corrosion protection</b>	aluminum, GRP, cathodic coating of steel parts
<b>Modular quick-change system</b>	for swift installation of the auxiliary equipment

\*additional mesh sizes optionally available

\*\*depending on composition of the soil

The possibility of changes to the product after the editorial closing date for this publication cannot be ruled out.
