TECHNICAL DATA SHEET PRUNING SCISSORS-PINCERS

EXTRATRUNK

EXTRA TRUNK is a professional tool for pruning shrubs and trees up to 8" in diameter. A mechanical clamp hooks the tree, a steel blade with very high resistance in Hardox® cuts off the trunk and a tubular structure holds the trunk in order to be placed in absolute safety on the ground or on a vehicle, without any risk to people or things. Extra Trunk can mount an additional jack (optional) to tilt the tool up to 45° and facilitate positioning in the most appropriate manner. This equipment is suitable for logging, thinning and cleaning of forests and pruning of vegetation on the roadside.
