

Ready-to-use Reagents for EZ Series Online Analyzers

Are you tired of mixing your own reagents?

How often do you have to prepare the reagents for your EZ Series analyzer and experienced the situation where you have other things to do instead of spending your time preparing the chemistries for your analyzer?

And do you fear that the preparation of the reagents could be a potential source of error where you lose confidence in results?

Would you prefer to use your online instruments with ready-to-use reagents from the same supplier?

With Hach's EZ reagent kits you can trust your results!

Ready-to-use

Hach EZ reagents are ready-to-use with EZ Series Online Analyzers. Since there is no additional preparation needed this eliminates an additional error source when using the EZ instruments and reagents system.

Confidence in your results

Reduce the sources of errors in your workflow to increase the confidence in your results.

Less complexity

Using ready-to-use EZ reagent kits from Hach can reduce the number of handling steps around your analytical equipment significantly which allows less hands-on-time and complexity.
