CATCH BASIN/WANDER HOSE

The robust rear-mounted suction system provides additional vacuum where you need it, such as emptying catch basins and waste bins. **With the pneumatically supported carrier arm**, the suction system can be moved effortlessly through the entire working area range, with air-adjustable raise/lower controls. **Pneumatic Support is standard equipment.**

SILENT PLUS PACKAGE QUIET SWEEPING OPERATION

The "Silent Plus" option utilizes sound suppressive material in the engine compartment effectively reducing noise pollution during sweeping to 87 dB(A).

Global V6AIR

The **Global V6AIR** Street Sweeper is designed to offer a very powerful sweeping system, superb water suppression system and easy maintenance.

With superb suction power the **Global V6AIR** is able to sweep on Both right and left side simultaneously if the operator chooses to do so. The super suction power will allow for sweeping heavy debris such as rocks, sand as well sad leaves and light debris.

The water system includes 502 gallons on water and a PM-10 sweeping system. This design offers optimal dust suppression in all sweeping conditions.

The large water capacity allows for sweeping all day without stopping to refill the water water tanks, saving time and increasing sweeping efficiency.

Global V6AIR includes Sweeping fan that is powered by hydraulic pump, reducing maintenance and total cost of operation.

Global V6AIR Standard Equipment

- Catch Basin Attachment
- Suction Duct and GB LED Worklights
- Suction Fan Water Flush w/ Shut off valve
- Hand Pump - Emergency Hopper Raise
- Hopper Raised Warning Buzzer
- LED Hopper Beacons
- High Pressure 1450 PSI Water Pump and Lance
- Rear View Camera with 7" LCD Monitor
- In-Cab Gutterbroom Tilt & Down Pressure Adjustment
- Right-Hand & Left-Hand Steering With Gauge Console

THE ULTIMATE "PURE VACUUM" STREET SWEEPER

ALL COMES DOWN TO POWER The sloping configuration of the suction fan optimizes the air flow and increases the suction power while reducing wear.

THE "V-NOZZLE" WILL SWEEP IT ALL The V-shaped Suction Nozzle with its large aperture, made of 4mm steel, conveys the swept material directly into the suction tube. This design enables the **Global V6AIR** to lift the Heaviest of debris in any application.

UNEVEN GROUND, NO PROBLEM The nozzle is suspended so as to oscillate around its center of gravity, which allows for adjustment to every bump on the sweeping surface. Contact pressure can be easily adjusted, to ensure that every type of surface is swept.

THE POWER BRUSH The channel brush or main transfer broom is mounted as a trailed brush and suspended separately from the suction nozzle. It is equipped with lateral shock absorbers and ground pressure adjustment in order to pick up heavy dirt off the road surface. The pneumatically controlled adjustment of the main transfer broom offers the best possible performance in every working condition.

SWEEP ALL DAY The twin water tanks provide a **total tank capacity of 502-gallons of water.** The primary fiber glass tank is fixed directly onto the sub frame under the hopper. The secondary tank, also made of fiber glass, is mounted in between fan and cab, providing additional noise protection.

QUALITY, BUILT TO LAST STAINLESS STEEL CONSTRUCTION Hopper Design includes only the best such as 304 Grade Stainless Steel (100%) integrated into the **8.5 Cu.Yd. Hopper.**

MODERN DRIVE CONCEPTS The **Global V6AIR** is designed with ECO friendly features. We are proud to say that our Auxiliary engine provides the lowest fuel consumption and lowest noise levels compared to competitive units during sweeping.

Global V6AIR STANDARD sweeping package includes Tier 4 Final 74hp Diesel John Deere engine with a fuel consumption of 2.5 gallons per hour.

The **Global V6AIR** includes **Galvanized Hopper Screens** that can be easily lowered for cleaning without raising the hopper. The Screening system is designed so that Hopper Screens do not plug up when sweeping light debris such as leaves.

EVERYTHING AT A GLANCE The **Global V6AIR** includes central operating panel and easy access to all the functions, while large digital display provides all the necessary information to the operator.

EASY SERVICE & MAINTENANCE All valves and adjustments for the electrical, pneumatic, and hydraulic systems are located in one central console, which is maintenance friendly and protects against water and dust.
