

FPI Mag Flow Meter Specification Sheet

Applies to the following models:

FPI Mag 3000

FPI Mag 5000

Applications

Hach's FPI Mag 3000 and 5000 Series flow meters are intended exclusively for clean water applications. These can include:

- Well Water
- Potable Water
- Pump Stations
- Rate-of-Flow Control
- Raw Water
- Transmission
- Distribution
- Effluent
- Filter balancing and backwash
- Pumping stations
- UV dosing
- Wells and booster stations

Benefits

- **Hot Tap Installation** - No service interruption
- **Accurate** - Measures the full flow profile
- **Lower Cost** - Installed savings more than 45%
- **Robust** - No moving parts to wear or break
- **Versatile** - Great for plant maintenance, upgrades and retrofits
- **Accessible** - Insertion design provides easy access
- **Virtually No Maintenance** - No field calibration required

Performance Advantages

- Hot tapped for quick, simple installation
- Measures the full profile, not just a single point
- High accuracy, FPI Mag 5000 +/- 0.5%
- FPI Mag 3000 +/- 1%
- Bi-directional flow indication and measurement
- Maintenance free
- Wide flow range
- Available from 4" - 138"

Features

- **No Service Interruption for Installation**

Hach's FPI Mag (Full Profile Insertion) electromagnetic flow meter is the only rugged steel shaft, hot tap full profile insertion flow meter available on the market. The FPI Mag installs without service interruption making it ideal for retrofits, upgrades and maintenance projects and sites not previously metered. The hot tap installation significantly reduces installation time; eliminating the need to de-water lines or cut pipe.

- **Accurate Measurement**

The multi-electrode sensor delivers an accurate measurement of the full pipe profile rivaling the performance of a full-bore mag meter. The repeatable, stable measurement across the entire flow profile compensates for variable flow profiles, including swirl and turbulent conditions.

- **An Economical Metering Solution**

Hach's FPI Mag is the industry's most economical flow metering solution offering unbeatable value in the cost of installation and ownership reducing installed costs by more than 45 percent in medium and large line sizes. The compact insertion design fits in confined spaces and offers complete accessibility. The flow meter can be removed in pipes under pressure for easy inspection, cleaning, calibration, or verification. Installation costs are reduced by eliminating the need for heavy equipment and extensive manpower.

- **Durability and Longevity**

The innovative flow meter comes pre-calibrated from McCrometer's NIST traceable calibration labs and requires no recalibration in the field. With no moving parts and a single-piece design, the FPI Mag's sensor contains nothing to wear or break and is generally immune to clogging by sand, grit, or other debris. The electrodes are encased in a heavy-duty 316 stainless steel sensor body for maximum structural integrity and coated with a NSF certified 3M™ fusion-bonded epoxy coating for operational longevity.

Signal Conversion and Transmission

The signal converter is where the raw flow data is converted into calibrated, usable output parameters for display and transmission through the transmitter. This allows the measurements, functional programming, and data logs to be communicated through the display visually and through external connections to transmit both wired and wirelessly to external devices and networks. There are two different models used in various applications; both are available as either meter or remote mount.

ProComm GO Transmitter

Hach's FPI Mag 3000 flow meter is accompanied by the ProComm GO transmitter and can be battery powered, ideal for remote installations and locations with unreliable power sources.

- Output options include pulse, 4-20mA, Modbus, and telemetry
- Battery powered with optional solar, AC or DC power with battery backup
- Offering $\pm 1\%$ accuracy
- DIY battery replacement and in-field programming available via USB cable and laptop
- 5-year full meter warranty, 5-year battery life
- UL, CSA certifications

ProComm Max Transmitter

Hach's FPI Mag 5000 is offered with the ProComm Max transmitter, offering greater accuracy and more sophisticated output options for users needing superior system integration and data collection.

- Output options include Digital Pulse, 4-20mA, Hart, Modbus, and Ethernet IP
- Datalogger and optional AMI/AMR
- Optional Class 1 Div 2
- AC/DC powered
- $\pm 0.5\%$ standard accuracy, $\pm 0.2\%$ optional
- Bi-directional flow standard
- Rated to 140F for high temperatures
- CE, UL, CSA certification

Installation

- **Hot Tap Installation** - No service interruption
- **Pipe Run Requirements** - Pipe run requirements for Hach's FPI Mag sensor can vary, depending on the disturbances in the pipe run. See FPI Mag flow meter manual 30127-05 or 30127-06, step 3 of the installation procedure for a table of upstream and downstream straight-pipe run recommendations.

FPI Mag Flow Meter Specifications

All specifications apply to both FPI Mag 3000 and FPI Mag 5000 models except where noted.

The full pipe averaging flow meter comes complete with Mounting Hardware, AC Converter with Dual 4-20mA output, 25 Feet of Dual Submersible Cables with quick connects at sensor, Stainless Steel Body, 316 Stainless Steel Electrodes, NSF Approved Fusion Bonded Epoxy Coating, 2" Stainless Steel Ball Valve (minimum of 1-7/8" port I.D.), 2" x Close Stainless Steel Nipple, 2-Year Warranty.

Physical Specifications

Measurement	Electromagnetic
Directionality	Forward and reverse
Pipe Sizes	Up to 138"
Body Style	Full profile insertion
Materials	<ul style="list-style-type: none"> Stainless steel body 316 stainless steel electrodes NSF approved fusion bonded epoxy coating 2" stainless steel ball valve (minimum of 1-7/8" port I.D.) 2" x close stainless steel nipple
Coating	Fusion bonded epoxy (NSF 61 approved) coated 316 stainless steel
Electrodes	316 Stainless Steel, Hastelloy optional
Electrical Connections	Quick Connect
Electronics	<ul style="list-style-type: none"> FPI Mag 3000: ProComm GO electronics FPI Mag 5000: ProComm Max transmitter
Electronics Mount	Remote mount only
Sensor Cable Lengths	<ul style="list-style-type: none"> Standard: 25'/7.6 m McCrometer supplied submersible cable with each remote mount unit. Optional: Up to 500'/152.4 m, or 25'/7.6 m max for battery powered. Quick connect: Available in standard cable lengths: Feet: 25, 50, 75, 100, 125, 150, 175, 200, 500 Meters: 7.6, 15.25, 22.5, 30.5, 38.1, 45.75, 53.3, 61, 152.4 Custom quick connect cable lengths at additional cost.
Insertion Hardware	316 Stainless Steel
Compression Seal	Silicone Rubber

Performance and Operational Specifications

Measurement Method	Volumetric flow in filled flow conduits 4" (100 mm) to 138" (3,500 mm) utilizing insertable electromagnetic averaging sensor. Flow indication in English Standard or Metric units.
Direction Measurement	<ul style="list-style-type: none"> 395 sensor: Forward flow measurement and reverse flow indication 394 sensor: Bidirectional flow measurement
Operating Temperature	-10 to 60°C (14 to 140°F) up to 250 PSI
Storage Temperature	-15 to 60°C (5 to 140° F) Note regarding storage: During freezing conditions and when meter is not in use, sensor must be removed from pipe and stored in dry conditions. Note: Damage to the sensor caused by allowing the sensor freeze in the pipe is not covered by the warranty.
IP Rating	<ul style="list-style-type: none"> Standard model: Quick Connect (IP68) HL model: Quick Connect (IP67)

FPI Mag Flow Meter Specifications (cont.)

Sensor Submersibility Depth	With standard quick connect: 9 m (30 ft.)
Velocity Range	See following pages flow velocity ranges by line size for each type of electronics.
Calibrated accuracy for forward and bidirectional sensors	<ul style="list-style-type: none"> • ProComm Max Electronics: $\pm 0.5\%$ of measured value ± 0.006 ft/s (± 0.0018 m/s) • ProComm Go Electronics : $\pm 1\%$ of measured value ± 0.006 ft/s (± 0.0018 m/s) • Reverse Flow: $\pm 1\%$ of measured value ± 0.006 ft/s (± 0.0018 m/s)
Linearity	0.3% of Range
Repeatability	0.2% of Reading
Pipe Run Requirements	Pipe run requirements for the FPI Mag sensor can vary, depending on the disturbances in the pipe run. See FPI Mag flow meter manual 30127-05 or 30127-06, step 3 of the installation procedure for a table of upstream and downstream straight-pipe run recommendations.

Other Specifications

Certifications and Approvals	<p>FPI Mag 3000</p> <p>Standard model:</p> <ul style="list-style-type: none"> • ISO 9001:2015 certified quality management system • Certified by MET to UL 61010-1 • Certified to NSF / ANSI Standards* <p>HL Model:</p> <ul style="list-style-type: none"> • ISO 9001:2015 certified quality management system • Certified by MET to UL 61010-1 and MET C22.2 No. 61010-1-04 <ul style="list-style-type: none"> • Class I, Division 2, Groups A-D, T5 • Class I, Zone 2, IIC T5 • Certified to NSF / ANSI Standards*

Meter Options and Accessories	<ul style="list-style-type: none"> • Sensor insertion tool • Extension to hardware clearance • Additional sensor cable up to 475' (500' max for model 395 and 200' max for model 394)
Warranty	2 years

* Certified by IAPMO R&T to NSF/ANSI 61 for material safety and NSF/ANSI 372 for low lead content.

Note regarding cable length: McCrometer recommends minimizing cable length. Electromagnetic flow meters may have unfavorable signal strength to noise ratio in electrically noisy environments. Longer lengths of cable increase the likelihood of interference. In those cases where the meter's signal must be transmitted a long distance, or where the environment may be particularly noisy, we suggest using the converter's analog output(s) that allows locating the transmitter as close as possible to the metering location.

ProComm Go Transmitter Specifications

Physical Specifications

Electronic Housing	Diecast aluminum, powder coated enclosure w/ tamper resistant seal, 6½" x 6½" x 43/8" tall
Transmitter Dimensions	See "Dimensions" section for meter mount and remote mount transmitter dimensions.
Power	Battery: Standard: three 3.6V lithium-thionyl chloride (Li-SOCl ₂) D size batteries with two AA backup batteries AC Power: 100-240VAC/45-66Hz (4W) DC Power: Linear power supply 10-35VDC (4 W)
Electrical Connections	<ul style="list-style-type: none"> Optional shielded cable for 10-32VDC/4-20 mA output Optional shielded cable for pulse out

Performance and Operational Specifications

Battery Life	Five-year expected battery life, five-year battery warranty
Location	Indoor or outdoor use
Altitude	Operating: 2000 meters Storage: 12,000 meters
Operating Temperature	-4° to 140° F (-20° to 60° C)
Storage Temperature	-4° to 140° F (-20° to 60° C)
Relative Humidity	0% to 100%
IP Rating	IP67 Die cast aluminum transmitter
Outputs	Digital output: Digital pulse (open collector) output for volumetric - Two isolated digital pulse (open collector) outputs for volumetric - AMI output Analog output: 4-20mA: Galvanically Isolated, 16 Bit resolution. All power configurations (including battery). Note: 9-30 VDC loop power required (not supplied via transmitter)

Display and Measurement

Display	<ul style="list-style-type: none">• 2-Line LCD display (no backlight)• Non-volatile memory• Anti-reverse totalizer (standard)• Total (to 9 digits of precision)		<ul style="list-style-type: none">• Flow rate and velocity (to 5 digits of precision)• Two alarms: low battery and empty pipe (optional)• Opening lid activates display			
Digits	5 Rate, 9 Total					
Units	GPM	Gallons per minute	IGM	Imperial gal per minute	CFM	Cubic feet per minute
	MGD	Mega gal per day	MI9	Miners inch (9G)	B5M	Barrels per minute (55G)
	CFS	Cubic feet per second	MI1	Miners inch (11.22G)	B5H	Barrels per hour (55G)
	MLD	Megaliters per day	APD	Acre feet per day	B5D	Barrels per day (55G)
	LPS	Liters per second	KLH	Kiloliters per hour	B4M	Barrels per minute (42G)
	CMH	Cubic meters per hour	LPH	Liters per hour	B4H	Barrels per hour (42G)
	LPM	Liters per minute	CMM	Cubic meters per minute	B4D	Barrels per day (42G)
	GPH	Gallons per hour	CFM	Cubic feet per minute

ProComm Max Transmitter Specifications

Physical Specifications

Electronic Housing	Diecast aluminum, powder coated enclosure w/ tamper resistant seal
Transmitter Dimensions	Remote Mount: Height: 7.3" (18.5 cm) Width: 8.5" (21.6 cm) Depth: 4.3" (10.9 cm) Meter Mount: Height: 6.9" (17.5 cm) Width: 7.2" (18.25 cm) Depth: 6.2" (15.7 cm)
Power	AC Power: 100-240 VAC / 47-66 Hz (10 W) DC Power: 10-35 VDC (10 W) Note: AC or DC must be specified at time of ordering.
Connection Options	Conduit option: 1/2" NPT threaded connections
Galvanic Isolation	All outputs are galvanically isolated from power supply up to 500 V
Conductivity	Minimum conductivity of 5µS/cm

Performance and Operational Specifications

Location	Indoor or outdoor use
Operating and Storage Temperature	-4° to 140° F (-20° to 60° C)
IP Rating	IP67 Die cast aluminum transmitter
Standard Outputs	Single 4-20mA (standard). Galvanically isolated and fully programmable for zero and full scale. A second 4-20mA is available. Two separate digital programmable outputs: open collector transistor usable for pulse, frequency, or alarm settings. <ul style="list-style-type: none"> • Volumetric Pulse • Range Indication • Maximum switching voltage: 35 VDC • Maximum switching current: 100mA • Insulation from other secondary circuits: 500V
Optional Outputs	<ul style="list-style-type: none"> • Modbus • HART • Ethernet IP • Datalogger • Smart Output™ (Sensus, Itron 6, Itron 9)

Display and Measurement

Keyboard and Display	Can be used to access and change set-up parameters using six membrane keys and an LCD display
