

Lab Essentials

Disposable Beaker

Made by
JEIO TECH

✓ Economical beaker with minimal price burden

- Domestic products made by mold designed and manufactured by Lab Companion's, minimizing the cost burden.

✓ Structure that can allow for accurate pouring without spillage

- The unique triangular spout structure allows even highly viscous solutions to be poured precisely without any dripping.

✓ Extended use area and excellent material

- Flat bottom shape for use on a magnetic agitator
- Convenient to use as it does not bend easily even when grasped in the hand.
- Polypropylene (PP) material with excellent chemical resistance.
- Autoclavable, possible to use up to 121°C.
- Four types of composition: 50 ml, 100 ml, 250 ml, and 500 ml.

Disposable Beaker
with Magnetic Stirrer (MS-T)

✓ Convenient design for actual users

- Stackable design that can store stacked beakers of the same capacity and save storage space.
- Easy to remove overlapping beakers.
- Semi-transparent material makes it easy to check the solution state from the side.
- Graduation are engraved and do not come off even after long periods of use.

Structure allows for pouring without spillage

The triangular spout allows for dripless pouring of even highly viscous solutions.

Can be used on magnetic agitator

Flat-bottom structure allows for use on a magnetic agitator by placing a magnetic bar.

Structure allowing for stacked storage

It is possible to store beakers of the same capacity by stacking and it is designed to allow the beakers to be removed easily.

Plastic Griffin Beaker (Transparent / Translucent)

Made by
JeioTech

Selectable materials according to purpose of use

- Choice of two series: polymethylpentene (PMP) transparent material and polypropylene (PP) translucent material with excellent chemical resistance.
- PMP: 135°C / PP: 121°C Autoclavable.

Structure that can allow for accurate pouring without spillage

- Pointed spout allows for dripless pouring of even highly viscous solutions.

Extended use area and excellent material

- Flat bottom shape for use on a magnetic agitator.
- Structure that does not become easily deformed.
- Convenient to use as it does not bend easily even when grasped in the hand.
- Plastic griffin beaker conforming to ISO 7056 standards.
- Repetitive use possible with excellent chemical resistance.
- Five different capacity configurations from 100 ml to 2000 ml.

Convenient design for actual users

- Stackable design that can store stacked beakers of the same capacity and save storage space.
- Easy to remove stacked beakers.
- Graduation are engraved and do not come off even after long periods of use.

Liquid Handling

Handle Beaker (Transparent / Translucent)

Made by
JEIOTECH

Beaker with a convenient handle

- Handles are convenient for handling, and large capacities can be handled with just one hand.
- The inside of the handle is rounded to minimize pain of hand when holding.

Structure that can allow for accurate pouring without spillage

- Pointed spout allows for dripless pouring of even highly viscous solutions.

Extended use area and excellent material

- Flat bottom shape for use on a magnetic agitator.
- Structure where beaker wall and floor thickness are both constant and do not become easily deformed.
- Plastic beaker conforming to ISO 7056 standards.
- Repetitive use possible with excellent chemical resistance.
- 500ml, 1000ml, and 2000ml capacity available.

Convenient design for actual users

- Stackable design that can store stacked beakers of the same capacity and save storage space.
- Easy to remove stacked beakers.
- Graduation are engraved and do not come off even after long periods of use.

Wash Bottle

Made by
JEIOTECH

Wash Bottle Common Features

- Easily sprayed solution even when lightly pressed for convenience.
- Made of excellent chemical-resistant material. (Bottle: LDPE, Cap & Tube: PP)
- Easy to use with wide hole for supplying liquid.
- Double-helical structure increases tightness of both container and cap.
- Replaceable nozzle tip for effective maintenance.
- Engraved markings for convenient capacity checking
- Built-in safety labels for identification provided as standard.

Automatic Gas-vent Type

- Vapor pressure self-discharge structure inside the container eliminates the inconvenience of liquid flowing out.

Distilled water container (bottle with lower spigot), HDPE material

- Excellent chemical resistance, suitable for storage and dispensing of various solutions.
- Leak proof No leakage even when using for a long time due to spigot.
- Adjustable dispensing capacity according to the rotation angle of the spigot handle.
- The spigot is rotatable, and uses a tubing connection with an adapter.
- Adapter can use Tubing ID 6.35 - 7.94mm.
- The cap is made of silicone gasket, so it has excellent sealing.
- Easy to check the capacity with front-side scale.
- Space-efficient design for solution storage.

Safety Waste Disposal System

More detail page 208

Made by
JeioTech

Easy to collect and store various chemicals and waste liquids generated in the lab

- > Structure minimizes vapor emission**
 Hinge-type lid minimizes the discharge of vapors from the waste solution into the lab.
- > Exclusive carbon filter (option)**
 Removes bad odors and harmful gas. (carbon filter can be replaced easily without removing existing attachment without the use of any tools)
- > Safe anti-static function (SF-14C, WT-20C model)**
 Prevention of explosion due to static electricity by using special plastic material with anti-static performance, and grounding cable is provided as standard. (completed anti-static performance test by KEPCO)
- > Water level notification function (SF model)**
 Risk level displayed on the safety funnel when at 17.6L (80%) or 15.4L (70%) based on a 22L waste liquid container.
