

MVE Doble Series

With Advanced QWick™ Charge Technology

The Doble Series cryogenic liquid dewars are the first units to be designed for both vapor shipment and liquid storage. The Doble QWick Series utilizes an absorbent wicking material that charges with liquid nitrogen in two hours. *New/warm tanks still need to be filled with ${\rm LN_2}$ and allowed to sit 24 hours to achieve maximum hold time. When a tank is already cold, the Advanced QWick Charge technology will apply, providing the capacity for same-day vapor shipping. A unique absorbent layer in the base of the storage tanks enables them to be charged with nitrogen and employed as dry shippers with hold times of up to 21 days. Once at the final destination, the tanks can be filled with liquid and used for long term storage, therefore avoiding the need for return shipments.

Key Features

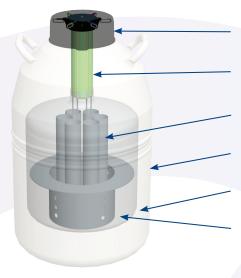

- MVE Protective Shipping Containers are recommended
- Protective shipping containers ensure upright shipping
- Liquid and vapor storage options
- Low liquid nitrogen consumption
- Convenient lightweight package
- O Charges in two hours*

THREE Year Vacuum Warranty • TWO Year Parts Warranty

Tank Features

- A Durable composite lid design
- **B** High strength neck tube reduces liquid nitrogen loss
- **C** Canisters
- D Strong, lightweight aluminum construction
- E Advanced chemical vacuum retention system
- F Hydrophobic liquid nitrogen absorbent system
