Installation

The WQMP sc Water Quality Monitoring Panel comes fully assembled on a corrosive-resistant HDPE panel with fiberglass mounting rails for easy installation onto a wall or rack. Simply connect the sample line (1/2" OD tube, factory supplied) to the inlet port and run a waste line (3/4" ID reinforced PVC hose) from the outlet port to a drain. The total sample flow requirement is 1.5 - 8.0 L/min. A 115V, 60Hz power source is required. Total power consumption is 500VA maximum.
