

The Best AV Appliances **Get Better**

New Product Enhancements:

- Lower current draw saves money; approximately 20-35% reduction across all settings
- Easier customization reduces labor and inventory costs
 - Snap-on bezels provide language and application options
- Model consolidation decreases inventory costs
 - Re-structured candela format eliminates separate standard and high candela models
 - Combined high-volume and high fidelity speaker eliminates individual high fidelity and high-volume models
- Additional formats expand application opportunities
 - Compact wall models for horns, strobes and 2-wire horn/strobes accommodate aesthetically sensitive sites
 - 8" speaker with higher dB output (1/8 - 8W tap settings) reduces the number of speakers required for sound and intelligibility
- Low Frequency Sounder models now available in compact size
- Low Frequency Sounder Strobes now with full candela range

Same Superior Features:

- Plug-in design speeds installation and essentially eliminates ground faults from crushed or pinched wires
- Onboard shorting spring provides wiring continuity check before devices are installed
- Colored lens option creates distinctive visual signaling; available in amber, red, blue and green
- Synchronization protocol remains the same allowing system compatibility between new L Series and SpectrAlert Advance models

Indoor models:

Horns, horn/strobes,
strobes, chimes,
chime/strobes, speakers,
speaker/strobes,
LF sounders and
LF sounder/strobes
