

PREMIER HEAT TRANSFER SOLUTIONS FOR GAS AND OIL PROCESSING

Thermal Fluid Heaters & Regen Gas Heaters

THERMAL FLUID HEATER EXPERTS

PREMIER MANUFACTURER

Today's highly technical methods for the extraction of gas and oil require heavy-duty thermal fluid equipment that can meet the strict demands of the industry. New discoveries and drilling techniques, in combination with advances in process technology, have led to the need for advanced, cost-effective and efficient heaters and systems that provide unsurpassed reliability.

Our equipment provides reliable operation in even the most rugged or hazardous environments, with custom heater designs featuring optimal fluid velocity and low coil heat flux to provide maximum fluid life.

- ▶ RUGGED & RELIABLE DESIGNS
- ▶ SIMPLE CUSTOMER OPERATION
- ▶ SYSTEM INTERFACING

DECADES OF EXPERIENCE

Fulton Thermal Corporation has been manufacturing thermal fluid heating equipment since 1971. We have the experience to design and engineer superior thermal heater systems backed by the largest dedicated service department in North America.

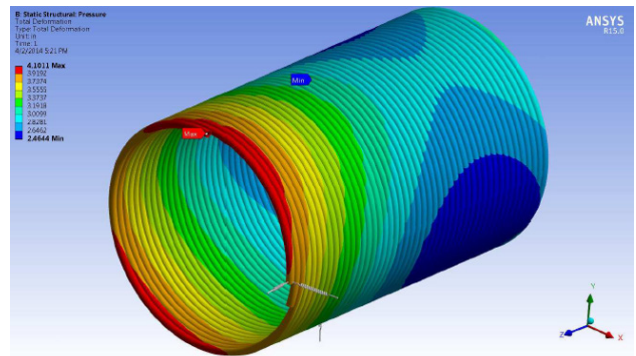

BUILT TO EXCEED EXPECTATIONS

ONE-STOP SHOPPING

Fulton is your single-source manufacturer of thermal fluid heater systems. We provide custom engineering to meet the most complex specifications and manufacture with materials tough enough to withstand the rigors of the job.

Each heater features a custom control system that is extensively tested, including a factory test-fire. Coil designs are subjected to stress and temperature analysis to ensure equipment longevity, and every coil is manufactured per ASME code.

- ▶ SINGLE-SOURCE MANUFACTURER
- ▶ PRECISION CUSTOMIZATION
- ▶ RIGOROUS IN-HOUSE TESTING & ANALYSIS
- ▶ FAST EQUIPMENT DELIVERY

▶ Fulton coils are designed for the process and subjected to stress and temperature analysis to ensure longevity in the field.

GLOBAL SERVICE NETWORK

Fulton Thermal Corporation offers peace of mind with the largest dedicated service department in North America.

Our service technicians are factory trained and able to provide rapid support for parts and service around the globe.
