

SP8018TRX

SELF-PROPELLED

# STUMPCUTTER

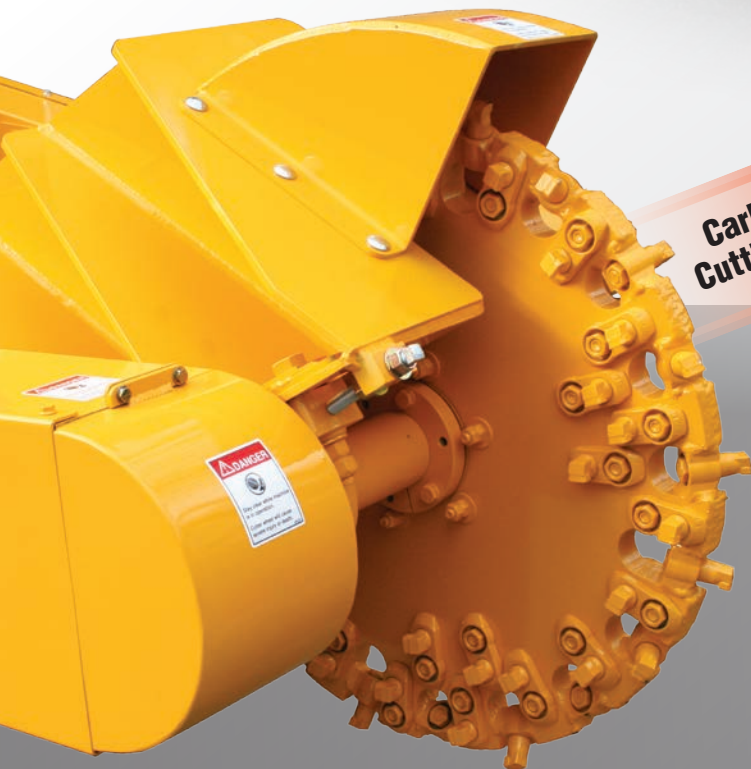

The Professionals Choice

# SP8018TRX STUMPCUTTER

The Carlton SP8018TRX is designed for the high production contractor working in both clearing and large residential removal applications. The SP8018TRX utilizes an exclusive combination of the most advanced systems to achieve unmatched productivity. The large cutting dimensions of 43 inches above ground, 18 inches below ground, and 80 inches of sweep allow the SP8018TRX to cut the largest stumps. With its 15 year history in the market the SP8018TRX has proven itself to be a reliable performer!

**80-Inch Sweep**

**Carlton Razor Cutting System**

**Caterpillar Track Undercarriage provides a large footprint for traction and floatation**

# SELF-PROPELLED

- **99 Horsepower Turbo Charged Kubota diesel** engine combined with Carlton's two stage cutterhead drive provides enormous cutting power.
- **Caterpillar Track Undercarriage** provides a very secure stance along with great tractive effort and legendary Caterpillar reliability
- **The patented turntable design** lowers the machines center of gravity making it very stable while providing massive cutting dimensions and reducing flex and wear points
- **Four Speed Ground Drive System** provides high speeds across distance and precise powerful control with high tractive effort when needed
- **Hydraulically Controlled Scrape Blade** provides ability to spread or move chip piles – making quick work of clean up
- **Carlton's wireless remote** distances the operator from dirt, dust, and noise while increasing their visibility of the area being worked – reducing fatigue
- **Carlton's Razor Cutting System** is simply amazing. The low profile holder design coupled with the large faced carbide teeth provide a high cut to friction ratio – this translates into highly efficient large cuts with minimal chip scatter. The Razor teeth utilize a thick carbide face which resists shattering and an extra hard fine grain carbide which resists wear. This is the most efficient system on the market – minimizing both cutting and cleanup time.

**Hydraulic Scrape Blade and high torque ground drive system provides plenty of power to make clean up a snap**

**Razor Cutting System provides large smooth cuts while reducing chip spread with increased tool life.**

# SP8018TRX STUMPCUTTER

At home on both clearing and residential job sites, the SP8018TRX makes the large jobs easy.

The SP8018TRX is just one stump cutter in the full line of high quality professional tree equipment Carlton manufactures. Carlton has been manufacturing stump cutting equipment for over 50 years and our commitment to quality can be found in every piece of equipment we manufacture. Plus, Carlton's staff of highly trained and experienced professionals stands behind every piece of Carlton equipment and is ready with answers to your questions. From parts and service to technical support, Carlton is dedicated to providing our customers with the best experience.

## SPECIFICATIONS

Engine options	99 HP Turbo Charged Kubota
Cutter depth below ground	18"
Cutter height above ground	43"
Cutter head swing	80" arc
Number of teeth on cutter wheel	76 Razor
Chip containment volume	50 cu. Ft.
Cutter wheel diameter with teeth	31"
Cutter wheel thickness	1 1/2"
Jack shaft bearings	2 3/16" Tapered Roller
Cutter wheel bearings	2 3/16" Tapered Roller
Fuel tank capacity	10 gallons
Hydraulic capacity	9 gallons
Track dimension	12" X 88" Long
Ground pressure	3.4 psi
Machine width	60"
Machine height	74"
Machine length	162"
Total weight	7260 lbs.
Paint	Dupont with Epoxy Primer

\*Due to commitment to constant improvement specifications are subject to change. Please consult factory for latest specifications.
